Educator's Corner : Teacher's Tools

## Catalogs

### The Test and Measurement Catalog

"The Big Catalog." With thousands of products listed, the Agilent catalog has become the standard of the instrumentation industry. 700 pages, hardcover. Available free from your local [Agilent Technologies Sales Office](#), or the [Agilent Test and Measurement Web site](#).

### The Basic Instrument Catalog

This catalog lists most of the products that educators use in their teaching labs: oscilloscopes, function generators, dc supplies, multimeters, counters, and logic analyzers. Most of the equipment carries a substantial educational discount to keep your program "within budget, without compromise." View the [Agilent General Purpose Instruments web site](#), or get a printed catalog free from your local [Agilent Technologies Sales Office](#), or the [Agilent Test and Measurement Web site](#).

### Agilent T&M Education Catalog

This catalog lists customer courses taught by Agilent application engineers. As an educator, you might want to enroll in one of these courses to broaden your technical horizons or to hone your knowledge of the latest technology. Some of these courses are available worldwide. View the [Agilent Technologies Sales Office](#), or the [Agilent Test and Measurement Web site](#).
